

HOME CARE NOTES

Respiratory Care: Oxygen, Sleep Apnea and Respiratory Services by VNSES

Description

Visiting Nurse Service Equipment & Supplies (VNSES) is committed to meeting the needs of persons with special medical conditions. We offer a wide variety of products, and our trained staff can assist in selecting appropriate equipment and supplies. We can provide solutions to problems encountered during day-to-day activities.

Patients can choose to visit our showroom or to have the products delivered to their home. Trained technicians will deliver the materials ordered, install them in the home and instruct the patient and family on proper use and care. Equipment, oxygen and supplies can be ordered and delivered 24 hours a day, 7 days a week.

Oxygen/Respiratory Services

- Oxygen cylinders

- No-charge comprehensive respiratory assessments

Sleep Apnea Services

- CPAP/BIPAP/Auto-PAP
- Comprehensive respiratory follow-up
- Personalized mask fitting by professional RRT staff

VNSES Positive Pressure Therapy Outcomes Above National Average

Obstructive sleep apnea is a disorder that affects more than 12 million people in the United States. Positive pressure therapy is the most common and effective therapy for obstructive sleep apnea. Unfortunately, only 61%-68.5% of those prescribed with positive pressure therapy will accept their treatment.

At Visiting Nurse Service Equipment & Supplies (VNSES), a member of the Akron General Health System, it is our goal to help patients achieve compliance with their positive pressure therapy. Failure to comply with treatment has been reported within the industry to be as high as 25% to 50%, with patients typically abandoning therapy during the first two to four weeks of treatment. That is why at VNSES we offer an extensive program consisting of follow-ups, troubleshooting and regular feedback to both patients and physicians. VNSES has a staff of full-time Registered Respiratory Therapists trained to improve patient acceptance and compliance through education to ensure that our patients receive optimum treatment. VNSES offers a 24 hour on-call service for patients who need assistance.

VNSES offers the latest portable equipment available in the market for positive pressure therapy, including CPAP, Bi-level and Auto-Titrating devices. VNSES offers a wide variety of mask styles for patient preference and also personalized mask fittings to ensure proper fit and comfort.

At VNSES we have been able to achieve compliance in over 80% of our positive pressure therapy patients, which is well above the national compliance average. Visiting Nurse Service Equipment & Supplies is available to provide your patients with all of their medical equipment needs. For more information, please call 330-434-1114.
